Reception

In an interview with Time Magazine in January 2024, Reggie Fils-Aim

3; commented that the system was "a necessary step, in order to g

et to Nintendo Switch." Fils-Aim also compared the system to the Game

Cube, claiming that the Wii U will be remembered fondly despite its re

latively poor sales.[237] Fils-Aim stated that the commercial failure of t

he Wii U, specifically the lack of clarity of the Wii U GamePad's

function, and the lack of support from third-party publishers to build out

its software library, led to how they changed the marketing and promotion f

or the Switch. He said the Switch's promotion was developed "to

make it crystal clear what the proposition is" for the systems, and that

they had "strong support" from large and small software dev

elopers and publishers to support the new console.[238]
