

# jogo caixa pela internet

For example, if a site offers a 100% match bonus up to \$100 on the first deposit, and the bonus has a 5x wagering requirement, that means you need to wager \$500 in total before you can withdraw any of the original \$100 first deposit bonus. You would need to "play-through" five times the bonus amount for it to be able to be withdrawn. For example, a \$200 bonus would need to be played through 10 times before it can be withdrawn.

It may be implemented by both physical hardware devices and software programs. In gaming lingo, what exactly is a "play-through" requirement?
