Unlike past games, weapons in Black Ops II have a progression system, which is used to unlock weapon attachments. After maxing out a weapon's level, the player can choose to "prestige" the gun, similar to how they can prestige the player level, and reset their attachment progress. In exchange, the player can customize their weapons with custom clan tags and emblems.

Black Ops II is also the first Call of Duty game to include a competitive mode. Known as League Play, the mode allows players of similar skill level to be matched together, and play according to the rules of Major League Gaming.

Setting and characters

To promote the release of Black Ops II's DLC packs, Activision released a series of live-action shorts starring Peter Stormare as The Replacer, an undercover agent sent to take the place of clients in their daily lives, while said clients can stay at home and play Black Ops II's new content. After explaining his duties, Stormare is then shown in multiple situations where he has taken over random people's jobs, such as masquerading as a pregnant lady's husband, working at an office, and enduring a grandmother's endless talking, among other such scenarios.

The second major DLC pack is known as Uprising. It was released for Xbox 360 on April 16, 2013, and came out for PC and PS3 players on 16 May.[60] It includes the new zombies map Mob of the Dead as well as new multiplayer maps Magma, Vertigo, Encore, and a re-imagining of fan-favorite from previous installment Black Ops Firing Range, known as Studio.[61]
