

brazino7777

This is especially true for the M1 Mac, which is consistently outclassed by the M2 Mac's power and is barely able to handle Medium settings. That said, both chips are quite underpowered when it comes to more demanding titles, and while the base M2 is clearly superior it still's not suitable for hardcore gaming.

Which MacBook Air is better for gaming, the 13-inch M1 or 15-inch ...

There has been much debate among gamers about which processor is better for gaming, Apple M1 or Intel i7. Both processors have pros and cons, and there is no clear consensus as to which is superior.

Howev🏧 However, gamers should keep in mind that i7 Macs offer more support for some native and non-native apps.

Comparing the M1 Chip Vs. Intel i7: Which is Faster?
