Although some patients notice results almost immediately after treatment, improvements typically show in approximately

2-3 weeks. Optimal results are achieved in 3-4 months. O-Shot

treatment results can potentially last up to three years, but many women choose

to have an 18-month follow-up or maintenance treatment.

Many patients experience noticeable improvements within the first three weeks following treatment, but the full

regrowth of tissue is not complete until approximately three months after the

injection. On average, the O-Shot lasts about

12-18 months.
