lhos e geralmente calculada como numa porcentagem do ganho realizado para o cliente.

Webster's Merriam-Webster dictionary defines it as: "a tax that is contingent on a specific event or activity." It is also known as a "contingent tax" or "contingency fee".

It is commonly used in the legal profession, where lawyers charge a fee only if they win a case. It is also used in real estate, where agents charge a fee only if they find a buyer for a property.

Other examples of contingent fees include:

- Insurance brokers who charge a fee only if they find a policy for a client.
- Real estate agents who charge a fee only if they find a buyer for a property.
- Lawyers who charge a fee only if they win a case.

It is important to understand the terms of a contingent fee agreement before entering into one. The agreement should specify the percentage of the fee, the event that triggers the fee, and the time frame for payment.
